# **ACCUS Advances in Carbon Capture Utilization and Storage**

## **Aims and Scope**

Climate change is a serious environmental issue facing the world today. Most promising technique to tackle climate change is through Carbon capture utilization and storage commonly known as CCUS. It is a unique technique, which could enable humans to tackle climate change. The aim of the journal is to publish high quality articles targeting full value chain associated with Carbon capture, transport, storage, utilization, and modelling.

**All published papers are peer reviewed and crosschecked by plagiarism detection tools.**

## SHORT DESCRIPTION ABOUT THIS CATEGORY

Climate change is a serious environmental issue facing the world today. Most promising technique to tackle climate change is through Carbon capture utilization and storage commonly known as CCUS. It is a unique technique, which could enable human race to tackle climate change. The aim of the journal is to publish high quality articles targeting full value chain associated with Carbon capture, transport, storage, utilization and modelling.
