GETC Geo-Energy Transition and Carbon Management

Aims and Scope

GETC aims to advance scientific and engineering understanding of subsurface and integrated energy systems that underpin the low-carbon transition. The journal welcomes research that deepens insight into geo-energy processes, strengthens carbon management strategies, and supports sustainable deployment of emerging energy technologies. It emphasizes studies that connect fundamental mechanisms with practical implementation, offering evidence and models that inform decision-making across the geo-energy and carbon-management landscape. Through this scope, GETC provides a focused venue for impactful contributions shaping future energy systems.

All published papers are peer reviewed and crosschecked by plagiarism detection tools.

GETC Geo-Energy Transition and Carbon Management

JUNE 2026. VOLUME 4, ISSUE 1, PAGES (1-60), ISSN ONLINE 3030-2951

Contents

CUMULATIVE INFORMATION ON THE STATUS OF H₂ PRODUCTION AND SUBSURFACE STORAGE IN INDIA	1
APOORV VERMA	
AI-DRIVEN OPTIMIZATION OF CO₂ EFFICIENCY IN CCUS PROJECTS	13
AHMED WAGIA-ALLA, MOHAMED ALGHAZAL, TURKI ALZAHrani	
CFD ANALYSIS OF HYDROGEN FAST-FILLING PROCESS	27
YUVRAJ SINGH PANWAR, MAYUR PAL, RAJESH KUMAR	
MODELING THERMAL FRONT DYNAMICS IN GEOTHERMAL RESERVOIRS USING AN OPEN-SOURCE MRST-MATLAB SIMULATION FRAMEWORK	55
ABDUL RASHID MEMON, PIJUS MAKauskas	

SHORT DESCRIPTION ABOUT THIS CATEGORY

Geo-Energy Transition & Carbon

Management publishes peer-reviewed research that advances scientific understanding and engineering innovation in subsurface energy systems, carbon management, and integrated low-carbon solutions to support the global transition to sustainable energy.
