JFOCG Jaw Functional Orthopedics and Craniofacial Growth

Aims and Scope

JFOCG promotes the advanced study, science, and practice of Jaw Functional Orthopedics and Craniofacial Growth. It serves both researchers and practicing clinicians by providing a space for the presentation and discussion of evidence-based jaw functional orthopedics research, treatment concepts, techniques, and procedures, and a Clinical space for the publication of and discussion on case reports. The objective of the Journal is to facilitate the effective worldwide transmission of new and innovative related research and knowledge. The journal publishes original scientific articles presenting information that is new and relevant to Jaw Functional Orthopedics. Additionally, publishes reports of innovative techniques and clinical treatments, systematic reviews of topics of interest to the field, reviews of new techniques/appliances and products, new uses for existing material, digital technology advances related to Jaw Functional Orthopedics, instructive clinical reports, editorials, and announcements of importance to the community worldwide.

The list of principal topics:

- Biology of craniofacial growth with an emphasis on the mandible and maxillae
- Clinicians' point of view – space for discussion based on scientific evidence, and clinical experience on topics of clinical interest
- Prevention and early treatment of malocclusion
- Treatment of malocclusion with Jaw Functional Orthopedics
- New materials/new products
- Temporomandibular Disorders (TMD)
- Dental sleep medicine
- Clinicians' space – case reports
- Jaw functional orthopedics and digital flow
- Advances in digital diagnosis
- Advances in digital images
- Occlusion and craniofacial growth
- Use of vibration (laser, electromagnetic, mechanical vibration) in the treatment with Jaw Functional orthopedic appliances
- Systematic reviews

All published papers are peer reviewed and crosschecked by plagiarism detection tools.
