JVE Journal of Vibroengineering

Journal of Vibroengineering Volume 23, Issue 6 contains papers selected for the Special Issue on Futuristic Trends and Emergence of Technology in Biomedical, Nonlinear Dynamics and Control Engineering.

The objective of this special issue is to concentrate on all aspects and future research directions related to these specific areas. In this context, we invite researchers to contribute original research articles as well as highly review articles that will seek the continuing efforts to understand the role of emerging technologies in biomedical, nonlinear dynamics and control engineering.

Aims and Scope

Journal publishes original papers presenting the state of the art in vibroengineering of dynamical systems.

The list of principal topics: Mechanical vibrations and applications; Fault diagnosis based on vibration signal analysis; Vibration generation and control; Seismic engineering and applications; Modal analysis and applications; Vibration in transportation engineering; Flow induced structural vibrations; Oscillations in biomedical engineering; Chaos, nonlinear dynamics and applications; Oscillations in electrical engineering; Acoustics, noise control and engineering applications; Fractional dynamics and applications.

All published papers are peer reviewed and crosschecked by plagiarism detection tools.
