# **MSEA Material Science, Engineering and Applications**

## **Aims and Scope**

MSEA is developed to publish and disseminate original research articles on the latest developments in materials science and engineering. The Journal publishes reviews and full-length papers reporting research results on, or techniques for, studying the relationship between structure, properties, and uses of materials.

The list of principal topics:

- Polymer matrix composite
- Metal matrix composite
- Ceramic-matrix composites
- Nano-materials and nanotechnology
- Smart materials/structures
- Advanced energy materials and energy harvesting materials
- Microstructure and mechanical properties, heat treatments, creep, fatigue, fracture, friction and wear, corrosion, coatings, material selection, etc.
- Mathematical modeling, novel applications, and numerical simulation of advanced materials and structures
- Methods of optimum design of materials and structures

**All published papers are peer reviewed and crosschecked by plagiarism detection tools.**

More information is available online <https://www.jvejournals.com>

**The journal material is referred:**

**GOOGLE SCHOLAR:** <https://scholar.google.com>

**CROSSREF:** <https://www.crossref.org>

**Internet:** <https://www.jvejournals.com>

**E-mail:** [publish@jvejournals.com](mailto:publish@jvejournals.com)

**Publisher:** JVE International Ltd., Geliu ratas 15A, LT-50282, Kaunas, Lithuania
