## VP Vibroengineering PROCEEDIA

Vibroengineering PROCEEDIA Volume 44 contains papers presented at the 58th International Conference on VIBROENGINEERING held in, Ventspils, Latvia, August 25-26, 2022. The main theme of the Conference is “Chaos, non-linear dynamics and applications”.

### Aims and Scope

Journal publishes original papers presenting the state of the art in vibroengineering of dynamical systems.

The list of principal topics:

- Measurements in engineering
- Mathematical models in engineering
- Acoustics, noise control and engineering applications
- Mechanical vibrations and applications
- Fault diagnosis based on vibration signal analysis
- Vibration control, generation and harvesting
- Seismic engineering and applications
- Modal analysis and applications
- Vibration in transportation engineering
- Flow induced structural vibrations
- Oscillations in biomedical engineering
- Chaos, non-linear dynamics and applications
- Oscillations in electrical engineering
- Fractional dynamics and applications
- System dynamics in manufacturing system modeling
- Dynamics of smart and functionally graded materials

**All published papers are peer reviewed and crosschecked by plagiarism detection tools.**
